

Valdez COVID-19 Unified Command

NEWS RELEASE # 004

For immediate release: 07/03/2020, 6:00 p.m.

Valdez, AK – The community of Valdez received confirmation of two additional non-resident cases of COVID-19 on Friday.

Both cases are asymptomatic adults identified through routine employer screening processes. They are in isolation, following the guidance of public health officials, and receiving follow-up care from an onsite company medical provider. The contact investigation for these two new cases is ongoing. Preliminary investigation indicates both patients, employees of Silver Bay Seafoods, remained in quarantine on campus with no contact with the community during their time in Valdez. Public health officials believe the current risk to the community for these cases is low.

As we move into the holiday weekend, please choose to celebrate safely. Continue making thoughtful and careful decisions as long as COVID-19 remains present in Alaska and beyond. Taking small, individual actions like hand hygiene, physical distancing, wearing a cloth face covering around others, keeping your celebrations small and outdoors, and staying home when you are sick all make a big impact towards keeping our community safe.

Please continue to monitor yourself for COVID-19 symptoms which include a fever, cough, sore throat, difficulty breathing, loss of taste or smell, and any new onset of illness. If you believe you have even mild symptoms, contact your healthcare provider for screening and closely follow their instructions. Remember to call ahead before you go to the doctor’s office, public health clinic, or hospital. The local medical team will continue to provide the best possible care for you and our community.

Limited asymptomatic testing is currently available in Valdez for select high risk populations. Visit www.valdezak.gov/COVID-19 for additional information and to learn more about different local testing options.

The Valdez Unified Command and public health officials continue to closely monitor the rapidly changing course of COVID-19. We remain committed to providing information, support, and resources to protect the health, safety, and well-being of Valdez during this unprecedented time.
